

Green Rubber Recycling Co.

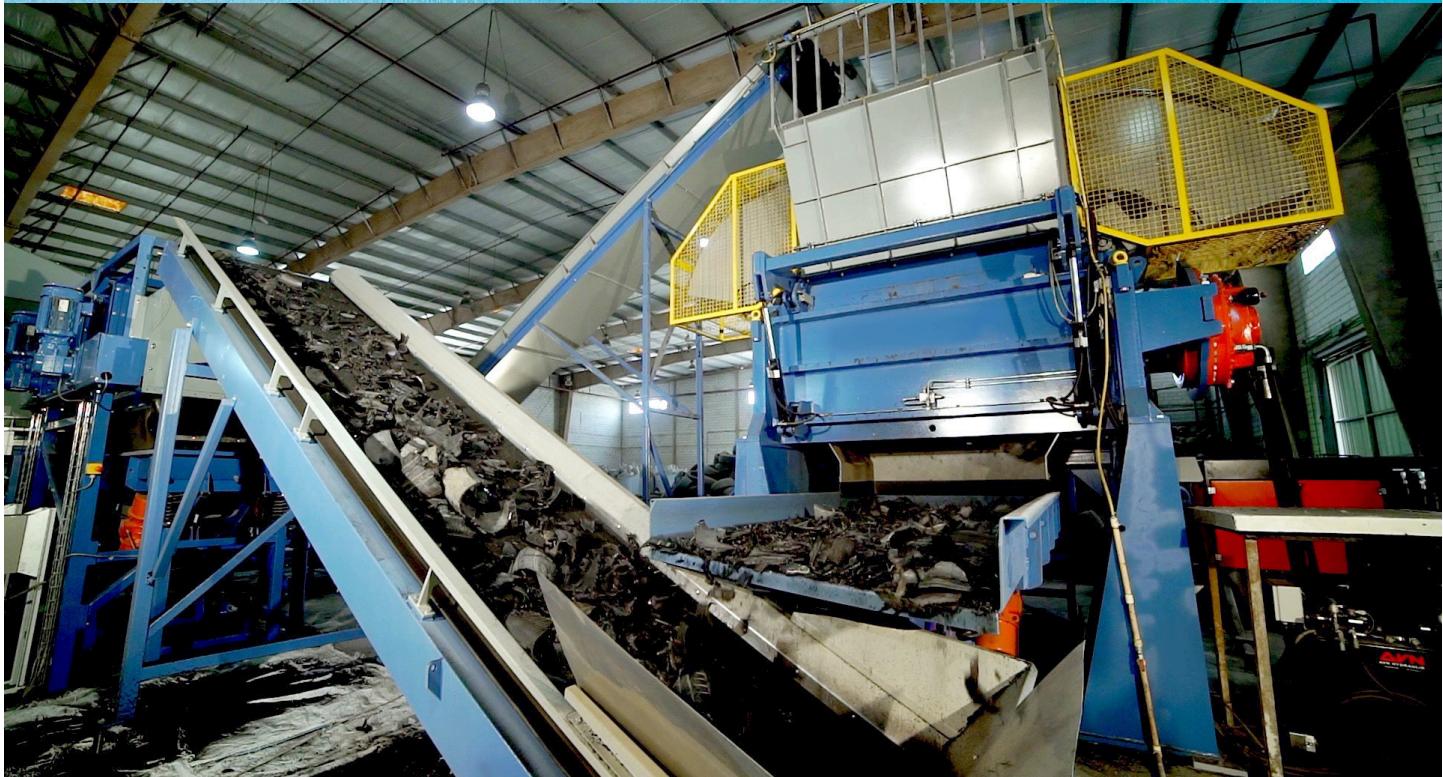

Every year, more than one billion waste tires are generated across the planet, and it is estimated that four billion end-of-life tires still exist in landfills and stockpiles. These mountains of unrecycled non-biodegradable tires are not only a pressing global environmental concern but also pose a grave danger as they are highly inflammable.

Our mission is to transform discarded tires into high-quality rubber tiles, promoting sustainability and minimizing waste.

**ISO 9001:2015, ISO 14001:2015 &
ISO 45001:2018 CERTIFIED COMPANY**

GreenRub Play

Play Safe

GreenRub Play tiles guarantee the highest safety standards on playgrounds by reducing the impact and thereby decreasing the risk of injury.

GreenRub Auto

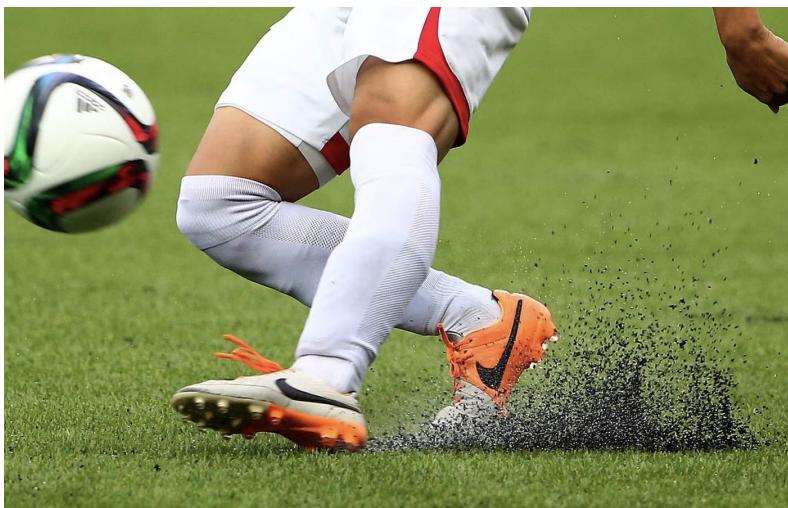

Tire Safe

When your car is parked for extended periods of time, your car's weight and pressure bear down on the same contact patch continuously, which is why flat spots are common after long-term parking. Flat spots on the tire can cause difficulty steering, vibrations, and an unpleasant drive!

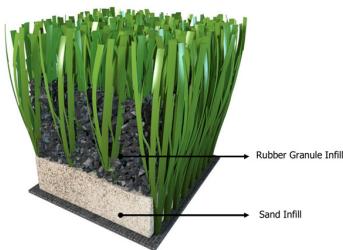

GreenRub Infill

Sports Safe

The proliferation of new-generation synthetic sports turfs for recreation, training as well professional sporting events today has led to an increase in accessible high-quality fields in difficult climates and also facilitated low operational and maintenance costs along with extraordinary environmental benefits.

The standard size of GreenRub Infill is 0.8 – 2.5 mm. Additionally, upon customer's request, we can manufacture a wider range of sizes and colors.

Our Products Benefits

Eco-Friendly: By utilizing recycled rubber, these tiles contribute to reducing environmental waste and promote sustainability.

Durability: Rubber tiles are highly durable and resistant to wear, tear, and weathering, making them suitable for high-traffic areas and outdoor use.

Shock Absorption: The inherent flexibility of rubber provides excellent shock absorption, making these tiles ideal for playgrounds, gyms, and other spaces where impact resistance is crucial.

Slip Resistance: The textured surface of rubber tiles offers enhanced traction, reducing the risk of slips and falls, especially in wet or slippery conditions.

Low Maintenance: Recycled rubber tiles are easy to clean and maintain, requiring minimal effort for upkeep.

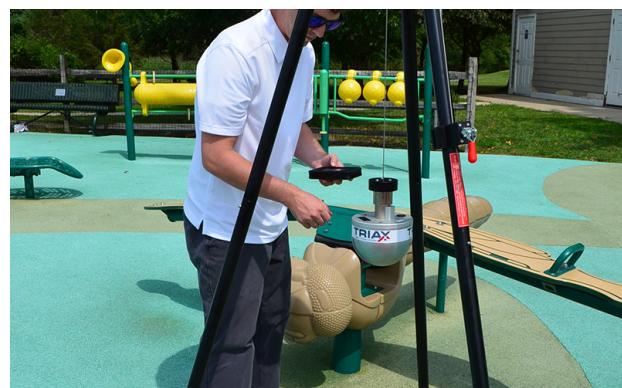

Noise Reduction: Rubber's sound-absorbing properties help reduce noise levels, making these tiles suitable for environments where noise reduction is desired, such as fitness centers or play areas.

Versatility: These tiles can be used indoors or outdoors, in residential, commercial, or recreational settings, offering flexibility in design and application.

Test and Certification

Greenrub products are rigorously tested using Triax 2015 impact test systems to ensure all flooring solutions meet top international safety standards for preventing head injuries. Safety is our top priority.
